

MARLEYOZONE

Environmentally Safe
Water Treatment Systems

Marley

Environmentally Correct,
Safe, Proven and Effective

Marley Cooling Tower

Since 1922, Marley has been the pioneer and innovative leader in the design and manufacture of cooling towers and related equipment. We've brought that spirit to cooling tower water treatment.

Ozone Water Treatment

Marley offers complete engineered water treatment systems for new or existing cooling towers. Components include base exchange water softeners, automatic conductivity control, flow control and ORP monitoring systems, pH control systems and side-stream and in-line filtration systems.

MarleyOzone

Ozone is colorless gas that occurs naturally in the environment. It can be produced commercially with an ozone generator by passing an oxygen-rich feed gas through a high voltage electrical discharge field (corona discharge). Properly applied, it eliminates all chemical biocides and destroys all bacteria, viruses and other pathogenic organisms, including Legionella in cooling tower systems.

Ozone decays naturally to oxygen, making it an environmentally acceptable choice for water treatment applications.

MarleyOzone is a comprehensive water treatment program that reduces or eliminates chemical usage utilizing ozone and mechanical filtration.

MarleyOzone Benefits

- ❑ Kills microorganisms
- ❑ Eliminates additional chemicals in the blow down
- ❑ Reduces or eliminates chemical storage, handling and associated risks and costs
- ❑ Reduces operating costs
- ❑ Effective over a wide pH range
- ❑ Keeps cooling tower distribution and collection water basins clear and reduces cleaning time and costs
- ❑ Safe for cooling system materials
- ❑ Improves system operating efficiency
- ❑ Available for any make or model of cooling tower

Certified Marley Service

Prevention is cheaper and better than treatment and repair. Without regular servicing your ozone system will, in time, develop the need for a shutdown. Regular service is best performed by a qualified Marley Water Resources service technician. Just as no one knows your business better than you, no one understands cooling tower needs better than the Marley.

A certified Marley Water Resources service technician has the knowledge and resources to provide a comprehensive treatment program.

Services include

- ❑ Scheduled monthly inspections and waster analysis and sampling
- ❑ Maintenance of site records
- ❑ Staff training
- ❑ Water analysis and optional Legionella testing by independent laboratories
- ❑ 48 hour breakdown response
- ❑ Firm and fixed prices for the duration of agreements with monthly invoicing

MARLEYOZONE

Clean Water
Minimum Shutdowns
Best Value

Marley's Commitment to You

- Service when you want it
- 24 hour response team
- Nationwide service technicians skilled in ozone service and maintenance to ensure a rapid diagnosis of faults and fast rectification with minimum production downtime
- Consistently cool, clean water at a minimum cost
