

# How is ozone made in Nature?

## How is ozone made by Ozone Generators?

**Same methods as above**

but on a much smaller scale

### Advantages of Corona Discharge

- High ozone concentrations
- Best for water applications
- Fast organic (odor) removal
- Corona cells can last for years without maintenance

### Advantages of UV Light

- Simple construction
- Lower cost than corona discharge
- Output hardly affected by humidity
- Less by-products vs. corona discharge
